# VENTURA MANAGED ACCOUNT PORTFOLIOS SUPERANNUATION (INCLUDING PENSION)

## INVESTMENT MODEL MENU

31 August 2018

The Product Disclosure Statement (PDS) is issued by Diversa Trustees Limited (the Trustee) ABN 49 006 421 638, AFSL 235153, RSE Licence No. L0000635, in its capacity as trustee of the Praemium SMA Superannuation Fund (referred to in this PDS as **VMAPS Super** or the **Fund**) ABN 75 703 857 864, an APRA-regulated superannuation fund. Praemium Australia Limited (**Praemium**) ABN 92 117 611 784 is the Sponsor of VMAPS Super. "VMAPS Super" is a product issued from the fund.

VMAPS Super invests exclusively in the Ventura Managed Account Portfolios ARSN 601 085 410 (referred to throughout this PDS as **VMAPS**, the **Scheme** or **Managed Account**), a registered managed investment scheme of which Ventura Investment Management Limited (**Ventura**) is the Responsible Entity.

This Investment Model Menu forms part of VMAPS Super PDS (**PDS**) dated 3 August 2017 and provides information on the Investments available through VMAPS. You should read this information before deciding whether to join VMAPS Super.

The information in this Investment Model Menu is of a general nature. It has been prepared without taking into account your particular investment objectives, circumstances, financial situation or needs. Before acting on the information in this PDS you should consider your own objectives, circumstances, financial situation and needs. You should also consider seeking the advice of a licensed financial adviser. This publication is not intended to be, and should not be construed in any way as, investment, legal or financial advice.

The information in this Investment Model Menu is correct as at the date of publication. In the event of a material change occurring to any information contained in this Investment Model Menu, irrespective of whether it is adverse or not, the Trustee will notify existing members in writing within the time frames required by law. Updated information is available online at [www.venturaFM.com.au](http://www.venturaFM.com.au).

# What is VMAPS

---

VMAPS is a registered managed investment scheme that provides access to a comprehensive range of Investment Models within a single consolidated investment Account (Account).

Investment Models are developed in conjunction with and managed by the investment manager(s) (Model Manager(s)).

## INVESTMENT SUMMARY

You can choose the way your money is invested in VMAPS Super by constructing your Account using a range of available investment strategies, called Investment Models. Each Investment Model has a different degree of investment risk, together with a different expected level of earnings. This is because each Investment Model is made up of different proportions of asset classes and/or investments within a specific asset class.

You should consult with your financial adviser to choose the Investment Model that best meets your personal investment objective and strategy. Some of the factors which you may wish to consider based on your personal circumstances include the:

- amount of time your money will be invested;
- level of investment earnings, including interest, dividends and capital gains/loss and
- level of risk you are comfortable with for the level of forecasted return.

Before you invest, you must read a copy of this current Investment Model Menu for each Investment Model you choose to invest in. The Investment Model(s) describe the investment objective, the investment strategy, the risk and return profile, and the investment time-frame of the Investment Model. Your financial adviser will provide you with the current documents for the investments you are considering. You should also read a copy of this current Investment Model Menu before making additional investments, as the composition of the assets in the Investment Models may change over time.

### Changes to Investment Models

Ventura has the right to change Investment Model(s) on the Investment Model Menu from time to time at its discretion. If your Account is invested in an Investment Model that is subsequently removed from the Investment Model Menu, you may be allowed to continue to hold the underlying investments in your Account, at the discretion of Ventura. Alternatively, if it is considered necessary, the Trustee may seek instructions to transfer these investments to another Investment Model(s) for you or where this is impracticable, to sell the investments on your behalf and pay the sale proceeds to your Cash Account.

### Risk profile

Determining your risk profile with your financial adviser is very important as investment risk can mean many things. An investment may be considered as carrying more risk if it has a higher likelihood of negative investment earnings, or if the earnings from that investment are more volatile over time.

Risk can also mean the possibility of your investment not keeping pace with inflation. Your individual risk profile will depend on a number of factors including how long you have to invest or how comfortable you are with a higher level of investment risk.

### Diversification

Diversification is one method that is used to reduce investment risk. Diversification can be achieved by investing in different asset classes (e.g. Australian and international securities, Australian and international fixed interest, property and cash).

VMAPS Super offers a range of Investment Models through which investors can seek to invest in a diverse range of asset classes.

### Choosing your Investment Model(s)

Investors are able to choose one or a combination of Investment Models available under VMAPS Super. The Investment Models that suit each investor will depend on various factors based on personal circumstances. Your financial adviser can assist you in assessing which Investment Model(s) most suit your personal needs.

The Investment Models available to investors in VMAPS Super are listed below. The actual allocation of each Investment Model will vary over time, usually within ranges set by the Model Manager under a mandate agreed with Ventura. Each Investment Model has its own investment objectives and strategy.

### Changing Investment Model(s) in your Account

You may change Investment Model(s) in your Account at any time. There are no administration or investment switching fees for switching between Investment Model(s), although transaction costs may apply. You should always consult your financial adviser before you select any Investment Model, or decide to increase or decrease your holding in any Investment Model.

## PROFILE DESCRIPTIONS

Important terms and information used in the description of Investment Models are explained below.

### **Investment Objective**

This is the goal of each Investment Model. The objectives described below for each Investment Model should not be considered an indication of the possible future performance of the relevant Investment Model, or of VMAPS in the future. There is no guarantee that the investment objectives will be achieved over any or all time periods.

### **Who is this option suitable for?**

The type of investor for whom the Investment Model would be suitable, taking into account the objectives and asset profile of the Investment Model.

### **Investment Strategy and Approach**

The strategy for a particular Investment Model is the means by which the Model Manager seeks to achieve its investment objective for the Investment Model. Actual asset allocations may vary within the range identified.

### **Asset Allocation**

The asset allocation is the percentage of the assets that are invested in each asset class. The asset allocation is determined by an investment range and a benchmark asset allocation target. At times the Model Manager will move the actual asset allocation away from the benchmark to maximise investment performance. The asset allocation will always remain within the asset class range unless the Model Manager and Ventura agree to a variation to the Investment Model.

### **Risk Level**

All investments carry some level of risk. To help you understand your investment risk we have rated the Investment Models based on the potential for a negative return over a specified period.

### **Investment Earnings**

The Responsible Entity and Model Manager(s) do not guarantee investment earnings and/or returns. The value of your investment(s) in an Investment Model and therefore the Scheme may rise or fall. Past performance should not be taken as an indication of future performance.

### **Model Management Fee**

The Model Management Fee for an Investment Model is an estimate of the investment management costs for managing the Investment Models and is charged by Ventura.

Ventura pays the fees levied by the Model Manager out of the Model Management Fee.

Investment Models are managed by the Model Manager(s). Underlying Investment costs may vary from time to time, based on changes in allocation of the underlying investments within the Investment Models.

## **Updates to Investment Information**

The target asset allocation may vary from time to time within the ranges detailed in the investment strategy of the Investment Model. The investment information provided on the previous pages is current as at the date of this Investment Model Menu. Updated information can be obtained from [www.venturaFM.com.au](http://www.venturaFM.com.au).

## Investment Model profiles

<b>Model Profile</b>	<b>Ventura Morningstar Defensive Model</b>			
<b>Code</b>	VI0010			
<b>Investment description</b>	This is an actively managed diversified portfolio of securities across both defensive and growth asset classes.			
<b>Investment objective</b>	To achieve a consistent income return by investing in a diversified portfolio of predominantly defensive asset classes, with a small proportion of growth asset classes.			
<b>Who is this option suitable for?</b>	The Defensive Investment Model may suit those investors whose main objective is stability of income and preservation of capital. A lower risk of capital loss can be expected, but overall returns are also likely to be lower.			
<b>Investment strategy and approach</b>	This is an actively managed diversified portfolio of securities across both defensive oriented asset classes, such as cash and fixed interest securities, and growth asset classes such as Australian equities, property and global securities. In general, the portfolio's long term average exposure will be around 85% defensive assets and around 15% growth assets, however the allocations will be actively managed within the allowable ranges depending on market conditions.			
<b>Benchmark</b>	CPI+0.75% p.a. over rolling 2yr periods			
<b>Asset allocation ranges (%)</b>				
	Sector	Min	Neutral	Max
	Australian shares	0	5	15
	International shares	0	7	15
	Global property securities & infrastructure	0	2	15
	Alternative Investments	0	2	20
	Australian bonds	0	28	70
	International bonds (hedged)	0	20	70
	Cash	10	36	90
<b>Number of securities</b>	15 – 80			
<b>Authorised investments</b>	ASX listed shares, international shares, property & infrastructure, fixed interest and alternative assets. Managed funds, ETFs, LICs and cash.			
<b>Fees</b>	Model Management Fee 0.55% p.a.			
<b>Risk level</b>	Low - Medium. Negative return 1 year in every 20 years			
<b>Suggested minimum timeframe</b>	2 years			
<b>Indirect Cost Ratio* (approx)</b>	0.15% p.a.			

\* Indirect Cost Ratio\* (approx) does not include Cash Holding Fee; see PDS for further information.

Further information on all Investment Models can be found in the Ventura Managed Account Portfolios PDS at [www.venturaFM.com.au](http://www.venturaFM.com.au)

<b>Model Profile</b>		<b>Ventura Morningstar Conservative Model</b>			
<b>Code</b>	<b>VI0009</b>				
<b>Investment description</b>	This is an actively managed diversified portfolio of securities across both defensive and growth asset classes.				
<b>Investment objective</b>	To achieve a consistent income return and a modest amount of capital growth, by investing in a diversified portfolio of predominantly defensive assets, with a small proportion of growth assets.				
<b>Who is this option suitable for?</b>	The Conservative Investment Model may suit those investors whose main objective is stability of income and preservation of capital. A lower risk of capital loss can be expected, but overall returns are also likely to be lower.				
<b>Investment strategy and approach</b>	This is an actively managed diversified portfolio of securities across both defensive oriented asset classes, such as cash and fixed interest securities, and growth asset classes such as Australian equities, property and global securities. In general, the portfolio's long term average exposure will be around 70% defensive assets and around 30% growth assets, however the allocations will be actively managed within the allowable asset allocation ranges depending on market conditions.				
<b>Benchmark</b>	CPI+1.0% p.a. over rolling 3yr periods				
<b>Asset allocation ranges (%)</b>					
	Sector	Min	Neutral	Max	
	Australian shares	0	9	30	
	International shares	0	13	30	
	Global property securities & Infrastructure	0	5	25	
	Alternative investments	0	6	25	
	Australian bonds	0	23	50	
	International bonds (hedged)	0	17	50	
	Cash	10	27	70	
<b>Number of securities</b>	25 - 80				
<b>Authorised investments</b>	ASX listed shares, international shares, property & infrastructure, fixed interest and alternative assets. Managed funds, ETFs, LICs and cash.				
<b>Fees</b>	Model Management Fee 0.575% p.a.				
<b>Risk level</b>	Medium. Negative return 2 years in every 20 years				
<b>Suggested minimum timeframe</b>	3 Years				
<b>Indirect Cost Ratio* (approx)</b>	0.19% p.a.				

\* Indirect Cost Ratio\* (approx) does not include Cash Holding Fee; see PDS for further information.

Further information on all Investment Models can be found in the Ventura Managed Account Portfolios PDS at [www.venturaFM.com.au](http://www.venturaFM.com.au)

<b>Model Profile</b>	<b>Ventura Morningstar Balanced Model</b>																																			
<b>Code</b>	<b>VI0008</b>																																			
<b>Investment description</b>	This is an actively managed diversified portfolio of securities across both growth and defensive asset classes.																																			
<b>Investment objective</b>	To achieve a moderate amount of capital growth along with a consistent income return, by investing in a diversified portfolio of growth and defensive assets.																																			
<b>Who is this option suitable for?</b>	The Balanced Investment Model may suit those investors whose main objective is to maintain stable returns. They are prepared to accept a low to moderate risk of capital loss to achieve this objective.																																			
<b>Investment strategy and approach</b>	This is an actively managed diversified portfolio of securities across both growth asset classes such as Australian equities, property and global securities; and defensive oriented asset classes, such as cash and fixed interest securities. In general, the portfolio's long term average exposure will be around 50% growth assets and around 50% defensive assets, however the allocations will be actively managed within the allowable asset allocation ranges depending on market conditions.

Further information on all Investment Models can be found in the Ventura Managed Account Portfolios PDS at [www.venturaFM.com.au](http://www.venturaFM.com.au)

<b>Model Profile</b>	<b>Ventura Morningstar Australian Shares Income Model</b>			
<b>Code</b>	VI0012			
<b>Investment description</b>	This is an actively managed concentrated portfolio consisting of our best income ideas in the S&P/ASX 200 Index.			
<b>Investment objective</b>	To outperform the S&P/ASX 200 Accumulation Index over a complete cycle.			
<b>Who is this option suitable for?</b>	The Australian Shares Income Investment Model may suit those investors seeking a reliable, above-market average income yield with moderate long term capital growth relative to that of the performance benchmark.			
<b>Investment strategy and approach</b>	An actively managed and concentrated portfolio consisting of ASX-listed stocks. The portfolio focuses on companies with competitive advantages, market prices offering a margin of safety and a sustainable dividend yield above the benchmark, including franking credits. This combination of factors helps to preserve capital and reduce volatility in various market environments. Total return will tend to be driven more by income than capital appreciation, although both are of course desirable.			
<b>Benchmark</b>	S&P/ASX 200 Accumulation Index			
<b>Asset allocation ranges (%)</b>				
	Sector	Min	Neutral	Max
	Australian shares	90	95	100
	Cash	0	5	10
<b>Number of securities</b>	15 - 30			
<b>Authorised investments</b>	S&P/ASX 200-Listed shares and Cash			
<b>Investment restrictions</b>	Maximum 15% per single stock Maximum 35% or 1.5x benchmark weight per GICS sector			
<b>Fees</b>	Model Management Fee 0.65% p.a.			
<b>Risk level</b>	Very High. Negative return 6 years in every 20 years			
<b>Suggested minimum timeframe</b>	6 Years			
<b>Indirect Cost Ratio* (approx)</b>	0.00% p.a.			

\* Indirect Cost Ratio\* (approx) does not include Cash Holding Fee; see PDS for further information.

Further information on all Investment Models can be found in the Ventura Managed Account Portfolios PDS at [www.venturaFM.com.au](http://www.venturaFM.com.au)

<b>Model Profile</b>	<b>Ventura Morningstar Global Shares Model</b>			
<b>Code</b>	VI0003			
<b>Investment description</b>	This is an actively managed portfolio of ASX-listed ETFs and Managed Funds with global equities exposure.			
<b>Investment objective</b>	To achieve capital growth by investing in a diversified portfolio of ASX listed ETFs and Managed Funds based on portfolios of international equities.			
<b>Who is this option suitable for?</b>	The Global Shares Investment Model may suit those investors whose main objective is to achieve capital growth through international equities. They are prepared to accept a high risk of capital loss to achieve this objective.			
<b>Investment strategy and approach</b>	An actively managed portfolio of ASX listed ETFs and Managed Funds with global equities exposure.			
<b>Benchmark</b>	MSCI ACWI Accumulation Index (Net Dividends Reinvested)			
<b>Asset allocation ranges (%)</b>				
	Sector	Min	Neutral	Max
	Global shares	90	95	100
	Cash	0	5	10
<b>Number of securities</b>	2-40			
<b>Authorised investments</b>	ASX shares, ETFs, Managed Funds, LICs and Cash			
<b>Investment restrictions</b>	Maximum 10% (ex ETFs) per single stock			
<b>Fees</b>	Model Management Fee 0.65% p.a.			
<b>Risk level</b>	Very High. Negative return 6 years in every 20 years			
<b>Suggested minimum timeframe</b>	6 Years			
<b>Indirect Cost Ratio* (approx)</b>	0.39% p.a.			

\* Indirect Cost Ratio\* (approx) does not include Cash Holding Fee; see PDS for further information.

<b>Model Profile</b>	<b>Ventura Dimensional Defensive Model</b>			
<b>Code</b>	<b>VD0001</b>			
<b>Investment description</b>	This is a diversified portfolio of predominantly income asset classes, with a small proportion of growth asset classes.			
<b>Investment objective</b>	To achieve a consistent income return by investing in a diversified portfolio of predominantly income asset classes, with a small proportion of growth asset classes.			
<b>Who is this option suitable for?</b>	The Defensive Model Portfolio may suit those investors whose main objective is stability of income and preservation of capital. A lower risk of capital loss can be expected, but overall returns are also likely to be lower.			
<b>Investment strategy and approach</b>	To provide a total return, consisting of income and capital appreciation, by gaining exposure to a diversified portfolio of companies and real estate securities listed on approved developed and emerging markets, and domestic and global fixed interest securities. The Investment Model will seek to target approximately 15% exposure to equities and 85% exposure to fixed interest assets.			
<b>Benchmark</b>	Weighted composite return of the sector benchmarks#			
<b>Asset allocation ranges (%)</b>	Sector	Min	Neutral	Max
	Cash	0	0	5
