

VENTURA MORNINGSTAR ALL GROWTH MODEL

May 2026

COMMENTARY

Overview

- Many markets pulled back sharply in March, ending the quarter weaker, with Australian and global equities declining as higher energy prices, inflation concerns, and geopolitical risks drove a spike in volatility.
- Energy and commodity exposed assets materially outperformed, while growth-oriented sectors lagged.
- Rising bond yields weighed on fixed income and listed property, reinforcing the challenges for duration sensitive assets in a higher-for-longer rate environment.
- Active asset allocation and diversification remain critical, as markets adjust to a more complex macro backdrop, marked by uncertain policy settings and uneven growth outcomes

About Morningstar

Morningstar Investment Management Australia Limited (ABN 54 071 808 501; AFSL 228986) is a leading provider of asset allocation, portfolio construction and investment research services with over 35 years experience in the United States, Australia and other international markets. Morningstar advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's Investment Approach

Morningstar's disciplined investment approach delivers independent, cost effective and holistic solutions for our clients – helping them reach their financial goals. This long-term, valuation driven approach is underpinned by an emphasis on preserving capital and undertaking meticulous comprehensive fundamental analysis of global asset classes and securities.

Portfolio Construction Process

When building diversified portfolios to achieve long-term real returns (after fees and taxes), a dynamic approach to asset allocation improves the outcome for investors. A total-portfolio-perspective approach that seeks to adjust the portfolio when the reward for risk changes, and measures risk in a more meaningful way to preserve capital for investors, is expected to provide a more stable and improved path to wealth accumulation. This approach is often contrarian to market consensus with patience and discipline provides significant investment opportunities.

Security Selection

Buying shares of superior businesses and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are the primary focus because history has shown that market sentiment is fleeting, momentum can quickly reverse, and the herd is sometimes a dangerous crowd. Occasionally, this approach causes our investment models to appear out of step, but willingness to be contrarian is an important source of outperformance.
