VENTURA MORNINGSTAR DEFENSIVE MODEL

November 2025

QUARTERLY COMMENTARY

Overview

- Markets remained calm in Q3, with emerging markets outperforming and bonds regaining appeal amid global rate-cutting cycles. Domestically, economic recovery is underway, but concentration risk in Australian equities and cautious RBA policy suggest selective investing remains key.
- Australian shares rose around 4% for the quarter, led by small caps and Materials, while global equities surged with the MSCI ACWI ex Australia up circa 6%, driven by strength in tech, communication services, and emerging markets.
- Fixed income showed steady gains, with the Bloomberg AusBond Composite up 0.40% for the quarter and 4% calendar year to date. While global hedged bonds outperformed short term with a 3-month return of a little over 1%.
- Global infrastructure remains strong, up nearly 15% calendar year to date. • The AUD strengthened against major currencies, hitting a 10-month high against the USD, which dampened unhedged global investment returns for Australian investors.

Model performance

About Morningstar

Morningstar Investment Management Australia Limited (ABN 54 071 808 501; AFSL 228986) is a leading provider of asset allocation, portfolio construction and investment research services with over 35 years experience in the United States, Australia and other international markets. Morningstar advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's Investment Approach

Morningstar's disciplined investment approach delivers independent, cost effective and holistic solutions for our clients – helping them reach their financial goals. This long-term, valuation driven approach is underpinned by an emphasis on preserving capital and undertaking meticulous comprehensive fundamental analysis of global asset classes and securities.

Portfolio Construction Process

When building diversified portfolios to achieve long-term real returns (after fees and taxes), a dynamic approach to asset allocation improves the outcome for investors. A total-portfolio-perspective approach that seeks to adjust the portfolio when the reward for risk changes, and measures risk in a more meaningful way to preserve capital for investors, is expected to provide a more stable and improved path to wealth accumulation. This approach is often contrarian to market consensus with patience and discipline provides significant investment opportunities.

Security Selection

Buying shares of superior businesses and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are the primary focus because history has shown that market sentiment is fleeting, momentum can quickly reverse, and the herd is sometimes a dangerous crowd. Occasionally, this approach causes our investment models to appear out of step, but willingness to be contrarian is an important source of outperformance.

About Ventura

Ventura Investment Management Ltd (Ventura) has been proudly managing the asset of Australian investors for over 10 years. Our mission is to assist all Australians in establishing and maintaining financial independence that will allow our investors to achieve what is most important to them.

To deliver this, we have created three series of investment solutions that can be tailored to individual circumstances and goals. Through our scale and expertise, our investors gain access to some of the world's leading asset managers.

Whether you're starting out, a sophisticated investor, or anywhere in between, we have professionally managed investment solutions that help ease the burden of the four key areas to building and maintaining investment portfolios: research, blending of selected assets, monitoring selected assets for quality and valuation and implementation.

About VMAPS

Ventura Managed Account Portfolios (VMAPS) is a next generation portfolio management solution that can be tailored to individual investor circumstances and goals. Through our scale and experience, our investors gain access to the thoughts and expertise of the world's leading asset managers.

Supported by professional financial advice, VMAPS offer investor benefits of:

1. Beneficial ownership of the investments in their portfolio (including payment of dividends)
2. Personal tax positions (including franking credits)
3. Transparency of portfolio holdings with quality online reporting
4. Low cost trading of portfolio holdings
5. Professional portfolio construction and management

With no minimum investment amount, the VMAPS solution offers choice of insurer and is available for Superannuation & Pension, or as ordinary, Non-Superannuation monies (including Self-Managed Superannuation Funds).
